Sensor - Water / Moisture

Water Sensor
SG\$2.70

This sensor works by having a series of exposed traces connected to ground and interlaced between the grounded traces are the sensor traces. The resistor will pull the sensor trace value high. [\[Product Details...\]](#)

Soil Moisture sensor
SG\$2.50

This Moisture Sensor can be used to detect the moisture of soil or judge if there is water around the sensor, let the plants in your garden reach out for human help. They can be very to use, just insert it into the soil and then read it. With help of this [\[Product Details...\]](#)

Analog Capacitive Soil Moisture Sensor- Corrosion Resistant
SG\$12.70

This product measures soil moisture levels by capacitive sensing, rather than resistive sensing like other types of moisture sensor. It is made of a corrosion resistant material giving it a long service life. Insert it into soil and impress your friends with [\[Product Details...\]](#)

Analog TDS (Water Total Dissolved Solids) Sensor for Arduino SG\$19.90

This is an Arduino-compatible TDS sensor/Meter Kit for measuring TDS value of the water, to reflect the cleanliness of the water. It can be applied to domestic water, hydroponic and other fields of water quality testing. [\[Product Details...\]](#)
